

✓ 1. REGISTER API DOCUMENTATION

POST /api/auth/register

Description

Creates a new user account using email, username, and password.

The backend validates required fields and ensures email + username uniqueness.

Request Body (JSON)

Field	Type	Required	Description
first_name	string	✓ Yes	User's first name
last_name	string	✓ Yes	User's last name
email	string	✓ Yes	Must be a valid email. If role = "Student", must match 123456@stud.fci-cu.edu.eg.
username	string	✓ Yes	Unique username (min 3 chars)
password	string	✓ Yes	Min 6 characters
role	string	✓ Yes	Either "Instructor" or "Student"
rememberMe	boolean	No	If true → generates long-lived JWT

Example Request

```
{  
  "first_name": "Dalia",  
  "last_name": "Adel",  
  "email": "dalia@stud.fci-cu.edu.eg",  
  "username": "daliaa",  
  "password": "123456",  
}
```

```
"role": "Student",  
"rememberMe": true  
}
```

Success Response (201 – Created)

```
{  
  "status": "success",  
  "token": "JWT_TOKEN_HERE",  
  "data": {  
    "user": {  
      "_id": "67a32...",  
      "first_name": "Dalia",  
      "last_name": "Adel",  
      "email": "dalia@stud.fci-cu.edu.eg",  
      "username": "daliaa",  
      "role": "Student",  
      "googleId": null  
    }  
  }  
}
```

Token is automatically sent as an **HTTP cookie** based on rememberMe.

Error Responses

400 – Missing required field

```
{  
  "status": "fail",
```

```
"message": "Please provide username and password."
}
```

409 – Email or username already exists

```
{
  "status": "fail",
  "message": "This email is already in use."
}
```

2. LOGIN API DOCUMENTATION

POST /api/auth/login

Description

Authenticates an existing user using email + password.
Returns JWT in cookie + user info.

Request Body (JSON)

Field	Type	Required	Description
email	string	 Yes	Must exist in DB
password	string	 Yes	Must match stored password
rememberMe	boolean	No	Longer cookie duration

Example Request

```
{
```

```
"email": "dalia@stud.fci-cu.edu.eg",  
"password": "123456",  
"rememberMe": true  
}
```

Success Response (200 – OK)

```
{  
  "status": "success",  
  "token": "JWT_TOKEN_HERE",  
  "data": {  
    "user": {  
      "_id": "67a32...",  
      "email": "dalia@stud.fci-cu.edu.eg",  
      "username": "daliaa",  
      "role": "Student"  
    }  
  }  
}
```

Token is also set as a **cookie**.

Error Responses

400 – Missing email or password

```
{  
  "status": "fail",  
  "message": "Please provide email and password."  
}
```

401 – Email Not Found

```
{  
  "status": "fail",  
  "message": "Invalid email"  
}
```

401 – Incorrect Password

```
{  
  "status": "fail",  
  "message": "Invalid password"  
}
```

3. GOOGLE SIGN-IN / SIGN-UP API DOCUMENTATION

POST /api/auth/google

Description

Handles login or registration using Google OAuth (token from Google).

Two cases:

Case A: Google account already exists → Login

Case B: First time Google login → Register

Request Body (JSON)

Field	Type	Required	When Required	Description
token	string	 Always	Always	Google ID token from frontend
role	string	 Only when creating new user	Only for new users	"Student" or "Instructor"

Field	Type	Required	When Required	Description
first_name	string	✓ For new users	Not needed for existing user	
last_name	string	✓ For new users	Not needed for existing user	
username	string	✓ For new users	Must be unique	

Example Request – Existing Google User Login

```
{
  "token": "GOOGLE_ID_TOKEN"
}
```

Example Request – New Google User Register

```
{
  "token": "GOOGLE_ID_TOKEN",
  "role": "Student",
  "first_name": "Dalia",
  "last_name": "Adel",
  "username": "dalia123"
}
```

Success Response – Existing User (200)

```
{
  "status": "success",
  "token": "JWT_TOKEN_HERE",
}
```

```
"data": {  
  "user": {  
    "_id": "67a32...",  
    "email": "dalia@gmail.com",  
    "role": "Student",  
    "googleId": "1122335544"  
  }  
}  
}
```

Success Response – New User Created (201)

```
{  
  "status": "success",  
  "token": "JWT_TOKEN_HERE",  
  "data": {  
    "user": {  
      "_id": "67a32...",  
      "email": "dalia@gmail.com",  
      "username": "dalia123",  
      "role": "Student",  
      "googleId": "1122335544"  
    }  
  }  
}
```

Error Responses

400 – Missing token

```
{  
  "status": "fail",  
  "message": "Google token required"  
}
```

401 – Invalid Google token

```
{  
  "status": "fail",  
  "message": "Invalid or expired Google token"  
}
```

400 – New Student with invalid college email

```
{  
  "status": "fail",  
  "message": "Student must use a college email"  
}
```

400 – Missing required fields for new account

```
{  
  "status": "fail",  
  "message": "First name, last name, username and role required"  
}
```
